Prof.R.N.Deshmukh Asst.Prof(E&TC),Nashik

**Objective-**

- Techxellence has turned the spotlight on emerging topics such as Wireless communication , Cyber Security ,CAD/CAM/CAE/CFD and Emerging Technologies of all steam of engineering
- Paper Presentation allows individuals to demonstrate their knowledge in depth of an area of engineering
- By communicating their research and subsequent opinions to a panel of judges tudent share the ideas in an interesting and engaging manner.
- Paper presentation consists of two stages. Firstly, student must write a paper on any engineering topic of their choosing.

- The second stage of the competition is an oral presentation about the written. This process shows the knowledge and presentation skill of individuals.
- The purpose of the Student Paper Competition is to recognize outstanding technical contributions from individual students.
- The purpose of the student poster presentation competition is to recognize technical knowledge through the graphical art.

### **Outcome-**

- Techxellence has provide the opportunities to the new researcher of engineering to present their presentation skills
- The main advantage or motto of the presenting paper is to bring students out of stage fear and also improve their communication skills
- The number of papers student present has helped to explore hidden talents in student and identify a positive difference in themselves
- It also provides an opportunity to learn in detailed about a core subject which is a part of curriculum and develop effective presentation skills
- Award with a certificate boost the confidence in student and this certificate count enormously at the time of interview
