Trimbak Road, Mahiravni, Nashik, 422213, Maharashtra, India

“Research Paper Writing”

Name of Program: Research Paper Writing

Venue: CS02 CLASS ROOM, DEPARTMENT OF INFORMATION TECHNOLOGY

Writing research papers is one of the easier way to build one’s career. In the time of Internet, one cannot be content with likes or views alone. The research papers have to be well thought of and be written for posterity and value. When we start researching, we consume a lot of information. We start with the fundamental What/How/Why questions. Then we move on to the sift through the gathered information, pick out the relevant portion for the topic, analyses them, and then write about it. This is a tedious process. But a well-researched article gradually improves your ability to go through voluminous data and pick out the relevant portion. This also helps in enhancing the research skills for your day job as a lawyer. You can study a huge the pile of briefs and assimilate the relevant arguments and points. It also helps to build your domain knowledge about a particular subject. Writing research papers is like an exercise for the cognitive part of one’s brain and helps to improve their mental abilities. The more you go down to the crux of the problem, the more it is suitable for your analytical skills. It helps develop focus, discipline, and logical thinking. The research paper has to have a logical connect throughout its entirety. So while writing one you develop the skill of critical thinking. The clarity in the research paper helps develop not only logical thinking but also brings clarity in communication between the readers and the author. The purpose of the research paper is to communicate an idea or opinion to the readers and peers. By writing more well-researched papers, an author develops and improves his communication skills.
