

Sandip Foundation's
Sandip Institute of Technology & Research Centre, Nashik
Department of Electronics & Telecommunication

Industry-Academia Innovative Practices

Date: 14/07/2014

Name of Event: Expert Lecture on Computer Networking

Name of Resource Person: Mr. Arvind and Mr. Rahul

Name and Address of Company: Technokraft Institute, Nashik

Objectives:

1. To bring awareness among the E&TC and Computer Engineering final year students regarding the subject Computer Network.
2. To cover the topic of all the networking devices and networking topologies.
3. To cover the topics like IP addressing, IP sub-netting, website management and routing of different protocols.
4. To get awareness about the Career Opportunities available in Networking Industries.
5. To motivate the final year students for the Networking-value added courses.

Outcome:

1. Students got an importance of the subject Computer network.
2. Students understand the concept of different networking devices as switch, repeaters, hub and Router.
3. Students analyze the different network topologies and various networking devices.
4. Students can easily identify the IP addressing classes and the different routing protocols.
5. Students come to know that lot of scope is there in Networking Industries in the globe.
6. The resource faculties motivated for the final year students for the networking value added course i.e. CCNA, etc.
