

**Date: 01/07/2014**

**Name of Event** : **How to Select Project**

**Date** : **01/07/2014**

**Name of Resource Persons** : **Prof. Sanjay S. Chopade**

**Address of Institute** : **SITRC Nasik.**

**Objectives:**

1. To introduce different areas of project and technology.
2. To understand the different controller and their uses in the project.
3. How to select different controller?
4. Resources required for the project.
5. He will able to choose right electronic components.

**Outcome:**

- After successfully completion of this lecture, students are having knowledge of 89c51, PIC, ARM microcontroller to be used for particular applications.
- The select microcontroller for the control based project.
- They select components and their rating for the control application.
- They select sensors for the speed controller applications.
