Date:

Name of Event: **Value Added Program on Company Specific training**

Date of Event: 15 February 2016 to 4 April 2016

Duration of Event: **1 Months 15 Days**

Name of resource person:

Prof. M.D.Nikose

Name and Address of Company:

SITRC, Nashik

Name of Event Coordinator:

Prof. M.D.Nikose

Participant:

SR.NO	NAME OF STUDENT	PRN NO	CLASS/DIV
1	Achutam Gupta		BEA
2	Krishna Sharma		BEA
3	Sahil Shaikh		BEA
4	Mayur Dabhale		BEA
5	Vrushabh Gadhari		BEA
6	Saurabh Patil		BEA

Objectives:

Participants will learn how to Solve the Quantitative Numericals, Reasoning question.

Participants will be able to solve mathematics quickly, and easily solve data sufficiency Numericals

This course trains the students in aptitude tests and communication skills as a part of preparing them for their campus placements. This programme focuses on strengthening the student's conceptual clarity of the fundamentals in Mathematics, and logical reasoning.

Training Goals:

- Aptitude tests help reveal the natural talents, strengths, and limitations that we all have.
- The process of assessing people is very complex and involves many different factors. Organizations are using aptitude testing increasingly frequently to improve their recruitment and development processes.
- When you test people's aptitudes, you look beyond what they've done in the past – and you assess what they have the potential to achieve in the future.
- You must first understand what you want to accomplish with your testing process, and then find the appropriate test. By doing a little research, carefully choosing your tests, and combining them with other assessment methods, you can improve your hiring and promoting process – and increase the chances of matching the right people with the right jobs.

Outcome:

1. **They offer efficient, objective comparisons** – The main reason companies use aptitude testing is to improve the quality of hiring and promoting. Tests are often much more efficient than interviews for determining if a person has the potential to do a job well. And when designed properly, aptitude tests can fairly and objectively compare and contrast the potential of different candidates.
2. **Reputable tests are standardized** – With standardization, you know the test is both valid and reliable, so you can be assured of a fair process. And if your recruitment practices are legally challenged at some point, the tests may help prove that you provide equal opportunity employment.
