

Date: 17/1/13

Name of Event: Two week Crash course on “*Introduction to C Programming*”

Name of resource person:

Mr. P. S. Aswale
AP, E & TC Department,
SITRC, Nashik.

Objectives:

The main objectives of this course is that the student should be able to

- Understand the concepts of constants, variables, data types and operators.
- Apply programming language concepts for program implementation.
- Apply appropriate logics to solve given problem.
- Write program using different implementations for the same problem.
- Use various control statements and functions.
- Identify different types of errors as syntax semantic, fatal, linker & logical
- Debug the programs.

Outcome:

In this course, the quick recap of basic concepts of the ‘C’ language was taken. The participants understood

1. How to develop the programming logic (skill).
2. The concept of learning by example.
3. How to develop efficient and error free programs in ‘C’

Participants:

S.E E &TC students
