

Sandip Foundation's
Sandip Institute of Technology & Research Centre, Nashik
Department of Electronics & Telecommunication

Date: 26/10/2016

Name of Event: Value added Program on “C Programming”

Name of resource person: Mr. Ganesh L. Attarde

Asst Professor, E&TC Dept SITRC, Nashik

Duration: 14 July, 2016 to 23 September 2016

Objectives: This course provides a fast-paced introduction to the C programming languages. students will learn the required background knowledge, including memory management, pointers, preprocessor macros, and how to find bugs when you inevitably use any of those incorrectly. Also It helps to Final year student to get placed in software and embedded company.

Course covers:

- Data types, operators
- Decision and loop control structures
- Arrays, Pointers, Strings, Functions
- Structures, Unions, File handling

Outcome:

1. understand the basic terminology used in computer programming.
2. write, compile and debug programs in C language.
3. use different data types in a computer program
4. understand the dynamics of memory by the use of pointers.
5. design programs involving decision structures, loops and functions.
6. After completion of this course, students are more confident about their technical aptitude

Participants:

Total number of participants: 13 students (B.E E & TC)
