Sandip Institute of Technology & Research Center, Department of Information Technology organized "**Group Discussion Session on Effect of Pandemic Covid-19 in Students Life**" for the TE IT students on 7th November 2020. Around 30 Students attended the Program.
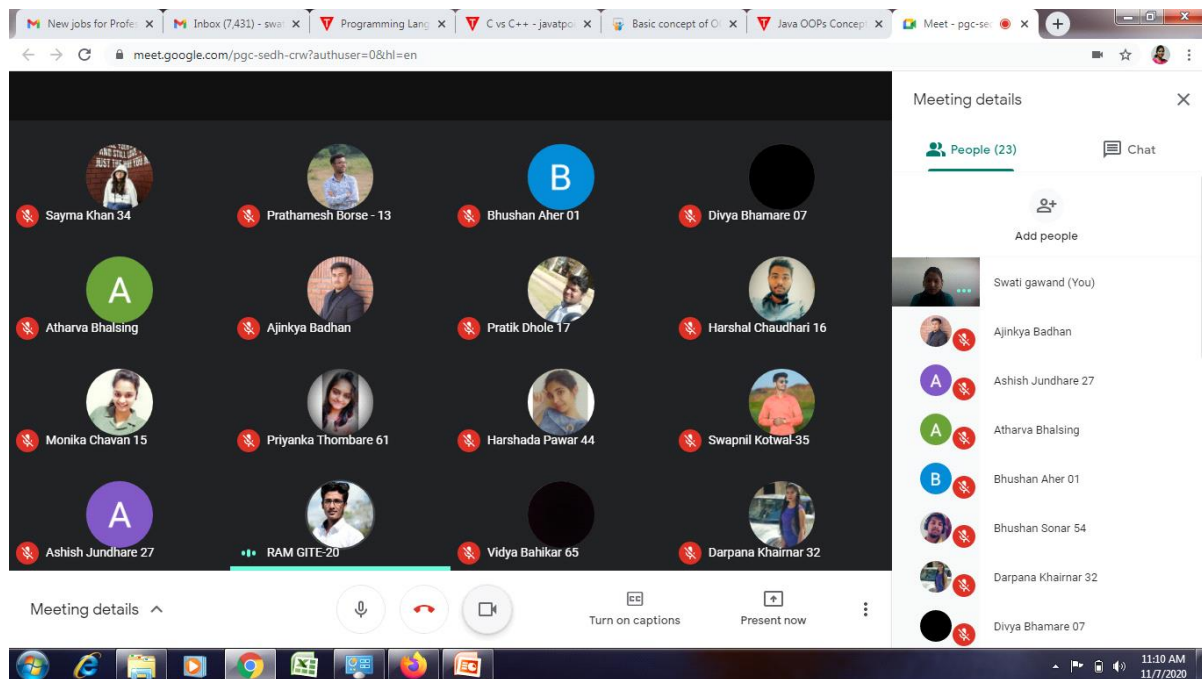

Students Discussed Following Points

The COVID-19 pandemic has affected educational systems worldwide, leading to the near-total closures of schools, universities and colleges.

The impact of pandemic COVID-19 is observed in every sector around the world. The education sectors of India as well as world are badly affected by this. It has enforced the world wide lock down creating very bad effect on the students' life. Around 32 crore learners stopped to move schools/colleges and all educational activities halted in India.
The outbreak of COVID-19 has taught us that change is inevitable. It has worked as a catalyst for the educational institutions to grow and opt for platforms with technologies, which have not been

used before. The education sector has been fighting to survive the crises with a different approach and digitizing the challenges to wash away the threat of the pandemic. Both the positive and negative impacts of COVID-19 on education are discussed and some fruitful suggestions are also pointed to carry out educational activities during the pandemic situation.
