Name of the Programme: Seminar on Road Safety

Date: 19th May 2023

Event Coordinator: Prof. Abhay Gaidhani

Participants: Students from SITRC colleges

Venue: Computer Department (C Building)

Aim: The aim of education, training and encouragement in Road Safety is to educate all road users in the proper and safe use of roads in order to change user attitudes and behaviour and to stimulate an awareness of the need for improvement in road safety.

Objective: To provide road safety information for road users to encourage safer road user behaviour among current and prospective road users and reduce the number of people killed and injured on our roads every year.

Outcomes: The event provided solutions for existing substantial problems such as traffic jams, number of accidents increasing and to reduce them.

Summary Report of Seminar on Road Safety Drive

A Seminar on 'Road Safety' was organised for students of SITRC. The seminar was organised on the occasion of Assistant Motor Vehicle Inspector Mr. Sudhir Bagul and Ms. Punam Dalvi, Nashik region guided the students to create the awareness regarding Road Safety. In all 70 students were present for the seminar.

In today's world road and transport has become an integral part of every human being. Everybody is a road user in one shape or the other. The present transport system has minimized the distances but it has on the other hand increased the life risk. Every year road crashes result in loss of lakhs of lives and serious injuries to cores of people.

In India itself about eighty thousand people are killed in road crashes every year which is thirteen percent of the total fatality all over the world. Man behind the wheel plays an important role in most of the crashes. In most of the cases crashes occurs either due to carelessness or due to lack of road safety awareness of the road user. Hence, road safety education is as essential as any other basic skills of survival.

Our aim is to provide road safety information for road users to encourage safer road user behaviour among current and prospective road users and reduce the number of people killed and injured on our roads every year.
