

SITRC SWAYAM-NPTEL Local Chapter in association with Department of E&TC Engineering, SITRC has received Texas Instruments (TI) Tools in terms of MSP430 Lunchbox kits (Seven in numbers) for hands on practice for the SWAYAM-NPTEL Online course on "Introduction to Embedded System Design".

**Fig. MSP430 Lunchbox Kits**

The above mentioned kits are useful to registered students to perform laboratory exercises during the online course in the field of Embedded Systems, Microcontrollers and Internet of Things. These kits are made available to our institution free of costs for academic purpose viz. hands on practice for Embedded System Design using MSP430 NPTEL Online Certification Course.
