## **SUMMARY:**

During our initial meeting, we identified two promising avenues for collaboration:

1. To establish a partnership with Sandip Foundation for India Immersion modules in Spain and Latin America.
2. Co-Branded Educational Programs: a joint effort to design co-branded Master's Programs or smaller courses that can be integrated into the curriculum of the Sandip University, Sandip Business School. These programs would cater to their India Immersion modules in Spain and Latin America, providing valuable educational opportunities.

The workshop aimed to enlighten faculty and students about the numerous benefits of EADIC Engineering, including:

- International Learning Programs
- Consultancy and BIM Solution
- EADIC e-Learning Factory

This event was an engaging and insightful experience, featuring foreign delegates with expertise in EADIC Engineering.
