Of

One Day Workshop (Hands-on Session) on "Cyber Security"

A.Y. 2021-22

Organized by,

Sandip Foundation's

Department of Engineering Sciences and Humanities

Sandip Institute of Technology and Research Centre, Nashik (MS)

DTE Code: 5109

Name of Program- One Day Workshop (Hands-on Session) on "Cyber Security"
Resource Person: Jainam Jain ,Cyber Security Professional, Konsola Pvt Ltd.

Event Coordinator: Assistant Prof. S.G. Dhake SITRC

Participants: FE students (ESH Department)

No. of Participants: 100

Venue: Online , Google Platform

Aim:
The aim of this   workshop was to enhance the understanding and practical skills of participants in the field of cyber security. The session intended to equip attendees with the knowledge and tools necessary to protect digital information and manage cyber threats effectively.

Objective:
    Students able to-

- • **Educational Awareness:** To raise awareness about the importance of cyber security in today's digital age.
- • **Skill Development:** To provide hands-on training on various cyber security tools and techniques.
- • **Threat Mitigation:** To educate participants on how to identify, analyze, and mitigate cyber threats.
- • **Best Practices:** To share best practices in cyber security and data protection.
- • **Networking:** To facilitate networking among participants and experts for future collaboration and learning opportunities.

Summary

The One Day Workshop on "Cyber Security" was a significant event that brought together individuals from diverse backgrounds to learn about the critical aspects of cyber security. The workshop included a blend of theoretical knowledge and practical sessions, allowing participants to gain hands-on experience with cyber security tools and techniques. The resource persons shared valuable insights and real-world examples, making the learning process engaging and informative.

The event started with an introduction to cyber security, covering fundamental concepts and the importance of protecting digital information. This was followed by hands-on sessions where participants worked on various exercises related to threat detection, analysis, and mitigation. The interactive nature of the workshop encouraged participants to ask questions and engage in discussions, further enriching their learning experience.

    1. .

Outcome

The session was highly beneficial for the students, achieving the following outcomes:

- **Enhanced Knowledge:** Participants gained a comprehensive understanding of cyber security principles and practices.

- **Practical Skills:** Attendees learned how to use various cyber security tools and techniques through hands-on exercises.
- **Threat Awareness:** Increased awareness of current cyber threats and how to defend against them.
- **Problem-Solving Abilities:** Improved ability to identify and solve cyber security issues.
- **Professional Development:** Enhanced professional skills and knowledge base for students and professionals in the field of cyber security.
Conclusion

The One Day Workshop on "Cyber Security" successfully achieved its objectives by providing participants with essential knowledge and practical skills in cyber security. The event highlighted the growing importance of cyber security in safeguarding digital assets and provided valuable insights into managing cyber threats effectively. Feedback from participants was overwhelmingly positive, indicating the workshop's success in meeting its aims and objectives.

Overall, the workshop was a productive and enriching experience, contributing significantly to the professional development of all attendees and enhancing their readiness to tackle cyber security challenges.
